

#### **Blast Communication**

#### **Pediatric Growth & Endocrinology ECHO®**

***Convenient virtual learning for Physicians and Nurses to enhance your skills and knowledge!***

**LAST SESSION BEGINS MARCH 24<sup>TH</sup> – LIMITED SPACE AVAILABLE!**

#### **What is Project ECHO®?**

Project ECHO® (Extension for Community Healthcare Outcomes) is an innovative project that uses a virtual model of health care education, by linking expert specialist at a “hub” with primary care providers in local community practice “spokes.” Together, they participate in twice a month ECHO® videoconference clinics, combined with mentoring and patient case studies. This is an educational approach that differs from telemedicine; as ECHO® clinics focus on tele-mentoring & education rather than direct clinical care.

#### **How does ECHO® work?**

This project is designed to expand the capacity of primary care practices to provide evidence-based, pediatric growth & endocrinology care in Georgia. Our lead faculty is Farah Khatoon, DO, MPH, a pediatric endocrinologist at Navicent Health–The Children’s Hospital in Macon, GA. This program offers a complimentary 1 hr. approved CME & Nurse Contact Hours per clinic (A maximum 8 Credits per learning session), and case-based learning in an effort to train & support community physicians & staff with virtual technology. Each 4 month learning session will feature 8 didactic clinics offered twice a month.

#### **Who should participate?**

We encourage all primary care providers & staff including: pediatricians, family physicians, physician assistants, nurse practitioners, nurses, and medical assistants to participate.

#### **When will this be offered?**

**Spring Session: March-June 2016**  
**(2nd & 4th Thurs 12:30-1:30 pm EST)**

<b>Benefits to Practices</b>	
✓	Complimentary Continuing Education (8 Credits)
✓	Convenient Virtual Learning
✓	Access to Pediatric Endocrinologist

#### **What Equipment do I need to participate in ECHO®?**

You will be able to participate and connect to the ECHO® clinic by phone (audio only) or by smartphone, tablet, or PC (video) by using Zoom™ Video Conferencing. If you choose to connect using Video conferencing, you will need a webcam. If you are interested in receiving a webcam, please contact the GA-AAP office.
