

Spectrum Disorders Developmental Pediatrics Seminar

Pediatrics by the Sea

June 12, 2019

R. Dwain Blackston, MD, FAAP
Chair
Committee on Children with
Disabilities
Georgia Chapter
American Academy of Pediatrics

Turn Your Dial to AFM - Acute Flaccid Myelitis Goals & Objectives

- ▶ List the clinico-radiological characteristics of Acute Flaccid Myelitis (AFM)
- ▶ Discuss the epidemiology and potential etiologies of AFM
- ▶ Review management and outcomes for patients with AFM

Screening & Services for Autism Spectrum Disorders in Georgia Goals & Objectives

- Identify diagnostic criteria for autism spectrum disorder
- List common screening tools to diagnostic criteria data
- Discuss diagnostic tools available to the medical home
- Apply patient diagnostic data when guiding treatment from the medical home

What's New with Fetal Alcohol Spectrum Disorder (FASD)? Goals & Objectives

- Describe the relative incidence of neonatal abstinence syndrome and the long-term impact of opioid exposure while in utero
- List the relative incidence of children impacted by prenatal alcohol exposure and the long-term impact of this exposure
- Discuss the future research in the areas of prenatal opioid and alcohol exposures
- Review how the care for individuals with a history of prenatal opioid and alcohol exposure can be moved from a centralized multidisciplinary clinic to community-based care models.

Members of the Committee on Children with Disabilities
